## PROJECTS

---

### Optimized Exam Duty Allocation System

Developed a web-based system to efficiently allocate exam duties to faculty members. The system integrates with a MySQL database for managing room and faculty information and includes an automated email notification feature to inform faculty members of their exam schedules

Technologies used : Java Servlets, JSP, JDBC, MYSQL ,HTML,CSS and Jakarta Mail,

### Instagram Clone

Developed a clone of the Instagram interface using HTML, CSS.

<https://subedibinod.github.io/insta-clone/>

### Weather App

Created a web application that displays current weather information based on user location using HTML, CSS, JavaScript, OpenWeatherMap API.

<https://subedibinod.github.io/weather-app/>

### Random Quote Generator

Built a random quote generator that fetches quotes from an API and displays them on the screen using HTML, CSS, JavaScript.
